

Welcome To Fifth Grade!

This parent curriculum guide provides an overview of what your child will be learning during the school year. Each grade's curriculum reflects the Illinois Learning Standards and provides focused learning experiences for students. Our district holds a commitment to continually improving our curriculum to foster growth in every classroom throughout our district.

We look forward to partnering with you throughout the school year. It is through our partnership that we empower every learner to be an engaged, confident, caring, and inspired citizen.

Please reach out to your child's teacher or principal to discuss specific grade level units and resources. More information about programs and assessments is available on the district website: www.northbrook28.net/programs

Best wishes for a successful school year!

Northbrook School District 28 Faculty, Staff, and Administration

Literacy

Literacy skills and knowledge are essential for student success in every area of the curriculum. District 28 uses a Literacy Studio model where students are immersed in experiences in reading, writing, speaking, listening and viewing that build agency and independence.

The model includes whole group instruction; small, needs-based groups; individual conferences, and ample time to read, write, speak, listen, and reflect independently and in groups.

Teachers create a caring, innovative environment where students experience a growth mindset and are able to make choices to navigate their learning.

By the end of fifth grade we expect students to be able to...

READING STRATEGIES

- make connections using schema.
- visualize and use sensory images to understand text.
- ask questions while reading.
- determine important ideas and themes in text.
- make inferences.
- synthesize.
- self-monitor while reading.

LITERACY AND INFORMATIONAL TEXT

- quote accurately when referring to text.
- determine the main ideas and summarize the text.
- compare and contrast texts.
- explain how an author uses reason or evidence to support points in a text.

FOUNDATIONAL SKILLS

- use grade-level phonics and word analysis skills.
- read with accuracy and fluency.

Literacy (cont.)

By the end of fifth grade we expect students to be able to...

WRITING

- write opinion pieces on topics or texts, supporting a point of view with reasons and information.
- write informative/explanatory texts to examine a topic and convey ideas and information clearly.
- write narratives to develop real or imagined experiences or events using effective technique, descriptive details, and clear event sequences.
- write clearly and with a purpose; keep the audience in mind.
- conduct short research projects that use several sources to build knowledge.
- use technology to publish writing.

SPEAKING AND LISTENING

- summarize information presented.
- identify reasons and evidence a speaker or media source provides to support particular points.
- identify and discuss misleading ideas.
- use expression and gestures.

LANGUAGE

- use correct grammar.
- use correct capitalization, punctuation, and spelling.
- use punctuation to separate items in a series/list.
- vary sentence length and style.
- compare and contrast styles used in literature.
- use a variety of methods to determine the meaning of an unknown word.

Library

The library curriculum focuses heavily on literature appreciation and cultivating a lifelong love of reading through exposure to a wide variety of reading materials and constant access to a school library with trained library personnel. In addition, students learn information literacy skills as outlined below.

By the end of fifth grade we expect students to be able to...

- effectively use the library catalog system, Destiny.
- determine importance when researching information.
- understand and utilize the 5 A's of research:
- ask questions to guide/direct research
- access online resources such as World Book and Britannica
- analyze the information as it is gathered into note taking form
- apply Information to create a shared product, and
- assess the research process.
- create accurate citations.
- use informational text features to locate information.
- choose appropriate materials independently from a wide variety of texts, including award winning titles.
- paraphrase information gathered from a resource.
- evaluate text and web-based information (bias, accuracy, purpose, author's intent).
- use primary sources to find information.
- interpret information from graphic aids.

Digital Citizenship

Digital Citizenship is the ability to think critically, behave safely, and participate responsibly through communication, collaboration, and creation in the digital world.

Children interact with technology at a very early age. Just as children learn about the world around them, they need to learn about the digital world: its benefits, how to behave safely, and the consequences of use. Providing instruction and experiences for children to learn about and practice digital citizenship is a proactive way to help them connect their offline and online behaviors.

We believe “it takes a village” to raise a digital citizen. The digital citizenship curriculum includes activities to teach students, resources to engage parents, and information to educate teachers and administrators. Lessons are presented in a timely manner to prepare students for new experiences, reinforce safe behaviors, and integrate with content material.

The topics covered in grades 2-8 are:

- media balance & well-being
- privacy & security
- digital footprint & identity
- relationships & communication
- cyberbullying, digital drama, & hate speech
- news & media literacy

Mathematics

District 28's Math curriculum is aligned to the Illinois Learning Standards which provide a solid foundation in whole numbers, addition, subtraction, multiplication, division, fractions, and decimals.

These elements support a student's ability to learn and apply more demanding math concepts and procedures. Additionally, the standards reflect application to the real world. Students practice applying mathematical ways of thinking to real-world issues and challenges, preparing students to think and reason mathematically.

By the end of fifth grade, we expect students to be able to...

OPERATIONS AND ALGEBRAIC THINKING

- write numerical expressions.
- interpret numerical expressions.
- generate two numerical patterns using given rules.
- analyze patterns and relationships of two numerical patterns.

NUMBERS AND OPERATIONS IN BASE TEN

- explain patterns in the product when multiplying by multiples of ten.
- read, write, and compare decimals to the thousandths.
- round decimals to any place.
- fluently multiply multi-digit whole numbers using the standard algorithm.
- find whole number quotients with two-digit divisors, using place value strategies.
- add, subtract, multiply, and divide decimals to hundredths, using models, drawings, and place value strategies.

Mathematics (cont.)

By the end of fifth grade, we expect students to be able to...

NUMBERS AND OPERATIONS - FRACTIONS

- add and subtract fractions with unlike denominators.
- solve word problems involving addition and subtraction of fractions with like and unlike denominators.
- interpret a fraction as division of the numerator by the denominator.
- multiply a fraction or a whole number by a fraction.
- interpret multiplication as resizing.
- solve real world problems involving multiplication of fractions and mixed numbers.
- divide unit fractions (fractions with 1 as the numerator) by whole numbers and whole numbers by unit fractions.
- solve real world problems involving unit fractions by whole numbers and whole numbers by unit fractions.

MEASUREMENT AND DATA

- convert like measurement units within a given measurement system.
- create a line plot for a data set with measurements in fractions.
- interpret the data of the line plot by using all four operations (+ - \times \div).
- recognize volume as an attribute of solid figures .
- measure volume by counting or using the standard formula.
- recognize volume as additive.
- solve real world problems involving volume.

GEOMETRY

- graph points in the coordinate plane, first quadrant only.
- solve real world mathematical problems involving the first quadrant of the coordinate grid.
- classify two-dimensional figures based on their properties.

Science

The purpose of science in District 28 is to support students in the development of content knowledge and the skills to ask and define questions, investigate, analyze data, construct explanations, design solutions, and to support their findings with evidence. Biological, physical and earth sciences are studied in kindergarten through fifth grade.

By the end of fifth grade we expect students to be able to...

SCIENCE AND ENGINEERING PRACTICES

- develop and use models.
- plan and carry out investigations.
- use mathematics and computational thinking.
- engage in argument from evidence.
- analyze and interpret data.
- obtain, evaluate and communicate information.

ECOLOGY: MATTER AND ENERGY

- identify the Earth's four major systems (geosphere, atmosphere, biosphere, hydrosphere) and how they interact with one another.
- explain how a geographical region's climate affects the organisms that live there.
- graph and analyze the amounts and percentages of water on Earth.
- create a model that shows how energy from the sun provides animals with the materials they need to live (includes photosynthesis).
- create a flowchart to demonstrate how organisms are related in food webs.
- describe how homeostasis is maintained and interrupted in an ecosystem.
- explain how human interactions (positive and negative) have affected the world around us.
- gather information, te the ways communities use science to protect the Earth.

Science (cont.)

By the end of fifth grade we expect students to be able to...

CHEMISTRY: STRUCTURES AND PROPERTIES OF MATTER

- use a particle model to show how the three states of matter differ.
- develop a model to illustrate the basic components of an atom (neutrons, protons, and electrons) and their location relative to the nucleus.
- provide evidence (using measurements and graphs) to demonstrate that the weight of matter is conserved when heated, cooled, or mixed.
- describe what matter is (takes up space and can be weighed) and identify its properties.
- use the periodic table to gain information about various elements (metal or nonmetal, number of electrons/protons, and state of matter at room temperature).
- make observations and measurements to identify materials based on their properties.
- explain the differences between atom, molecule, elements, mixtures, and compounds.
- experiment to determine whether mixing two or more substances results in new substances.

Science (cont.)

By the end of fifth grade we expect students to be able to...

SPACE: STARS AND THE SOLAR SYSTEM

- explore and describe how an object's mass is related to the force of gravity on that object.
- explain that gravity pulls towards the center of the Earth, not necessarily "down."
- gather evidence to support the argument that gravitational force pulls to the center of the Earth.
- explain how a star's distance affects how it appears in space.
- identify similarities and differences between the sun's appearance and the appearance of other stars in the sky.
- use a graph to explain why the length and direction of shadows are different throughout the day.
- use an illustration to communicate why the length of shadows are different throughout the year.
- communicate with a drawing why the sun is out longer in summer and less in winter.
- analyze how the visible constellations are affected by the Earth's orbital motion around the sun.

Social-Emotional

Effective SEL programs begin at an early age and continue through high school. They work to develop students' key SEL skills. These include five core social and emotional competencies: SELF-AWARENESS: Knowing what we are feeling in the moment; having a realistic assessment of our own abilities and a well-grounded sense of self-confidence.

SOCIAL AWARENESS: Sensing what others are feeling; being able to take their perspective; appreciating and interacting positively with diverse groups.

SELF-MANAGEMENT: Handling our emotions so they facilitate rather than interfere with the task at hand; being conscientious and delaying gratification to pursue goals; persevering in the face of setbacks and frustrations.

RELATIONSHIP SKILLS: Handling emotions in relationships effectively; establishing and maintaining healthy and rewarding relationships based on cooperation, resistance to inappropriate social pressure, negotiating solutions to conflict, and seeking help when needed.

RESPONSIBLE DECISION MAKING: Accurately assessing risks, making decisions based on a consideration of all relevant factors and the likely consequences of alternative courses of actions, respecting others, and taking personal responsibility for one's decisions. (Excerpt from Safe & Sound, CASEL)

By the end of fifth grade we expect students to have an understanding of the following skills:

- review and practice the 9 step problem solving model
- accepting consequences/responsibility
- get calm/ keep calm
- dealing with disappointment
- standing up to bullying
- goal setting
- peer pressure

Social Studies

The purpose of Social Studies in District 28 is to develop curious global citizens who think deeply about the world, can take multiple perspectives, and are inspired to take action.

Using an inquiry approach, students will study history, economics, geography, and civics at all grade levels.

Social Studies for kindergarten through fifth grade focuses on the home, school, community, City of Chicago, State of Illinois, regions of our nation, and the United States.

By the end of fifth grade we expect students to be able to...

INQUIRY SKILLS

- develop essential questions, identify their importance.
- create supporting questions to help answer an essential question.
- identify resources with multiple viewpoints.
- gather important information from multiple sources, understanding the difference between facts and opinions (use to determine credibility of a resource).
- develop claims to answer an essential question.
- create and critique ideas from multiple sources.
- identify local problems and ways people are addressing these problems.
- use different methods to come to conclusions and take action in their classroom and school.

CIVICS

- identify and describe the different responsibilities and powers of government officials at various levels and branches of government (including different times and places).
- study the history and purpose of laws, rules, and important U.S. provisions.
- compare the history, purpose, and structure of different systems within government.
- explain how policies are developed.

Social Studies (cont.)

By the end of fifth grade we expect students to be able to...

GEOGRAPHY

- explore how the culture and the environment of places within the United States change over time.
- describe how humans have used natural resources in the United States.
- analyze the impact of catastrophic events, environmental events, and technological developments have changed the nation.
- compare the impact of events between the U.S. and other places.
- compare the environmental characteristics of the U.S. to other places, across the globe.

ECONOMICS & FINANCIAL LITERACY

- study why people, businesses, and nations specialize and engage in trade.
- explore how positive and negative incentives impact behavior on the national and world economy.
- describe the ways the government pays for the goods and services that are provided.
- explain the concept of interest.

HISTORY

- create and use a chronological series of events, to compare events that happened at the same time.
- use information about a historical source to determine usefulness in studying a specific topic.
- explain the causes and effects of important events and developments in U.S. history.
- use resources to investigate how people contribute to the development of Illinois.
- explain the causes and effects of important events and developments in Illinois.

Spanish

All students in grades one through five will study Spanish for 30 minutes daily. Students focus on basic language acquisition and cultural awareness in a learning environment in which students are immersed in the Spanish language.

By the end of fifth grade we expect students to be able to...

LISTENING COMPREHENSION

- understand simple descriptions, stories, and conversations directly related to the curriculum.
- follow simple directions given in the target language.

SPEAKING

- mimic correct Spanish pronunciations.
- speak about known topics in familiar conversations, as appropriate to grade level.
- use the target language in spontaneous and meaningful ways.

¡Hola !

READING

- recognize the alphabet, sound/letter correspondence and target vocabulary words in Spanish.
- read simple descriptions, stories and conversations directly related to the curriculum, as appropriate to grade level.

WRITING

- write simple guided sentences and phrases directly related to the curriculum, as appropriate to grade level.

CULTURE

- recognize common Hispanic holiday traditions and celebrations.
- recognize where Spanish is spoken in the U.S. and worldwide.
- participate in children's songs and games from Spanish-speaking cultures.

Art

District 28's art classes focus on developing students as artists who communicate ideas visually, express a point of view, and use inspiration from the world around them when creating their artwork.

By the end of fifth grade we expect students to be able to...

DRAWING

- understand the concepts of realism and abstraction and be able to draw in these modes.
- draw different subjects in an interpretive style.

SCULPTURE

- continue to use various methods (ie; coil and slab) to build and attach clay.
- create a relief or in-the-round sculpture from paper mache.
- use advanced techniques to create a sculpture.

ART APPRECIATION

- compare and contrast different artworks.
- be able to identify many different art forms (e.g., stained glass, mosaics).
- distinguish between form and function.

PAINTING

- identify and use different color theories in a painting.
- use their own ideas within a theme.
- understand that painting is a means of self-expression.

DESIGN

- expand use of art concepts including values, positive-negative space, and patterning.
- develop a theme to visually express an idea.

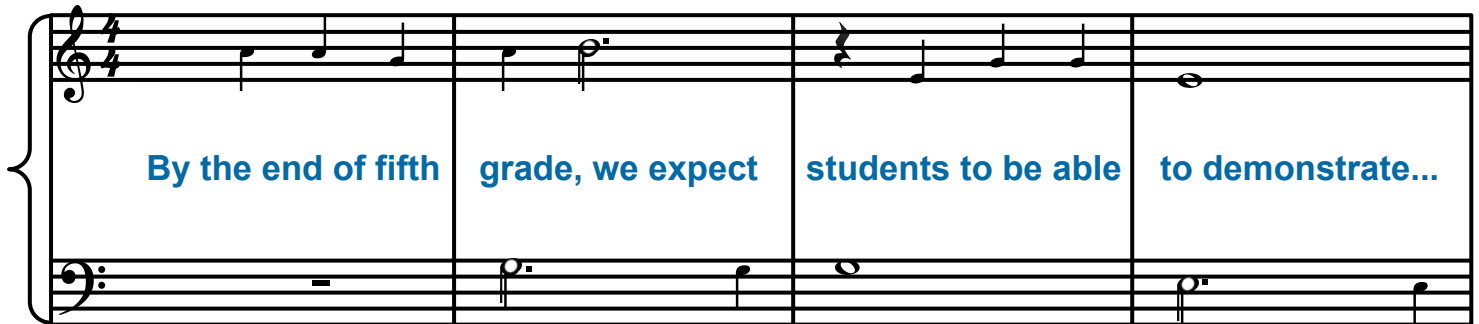

GRAPHICS

- introduce multicultural printing techniques (e.g., adrinkra, and gyotaku).
- use carving techniques to create a print.

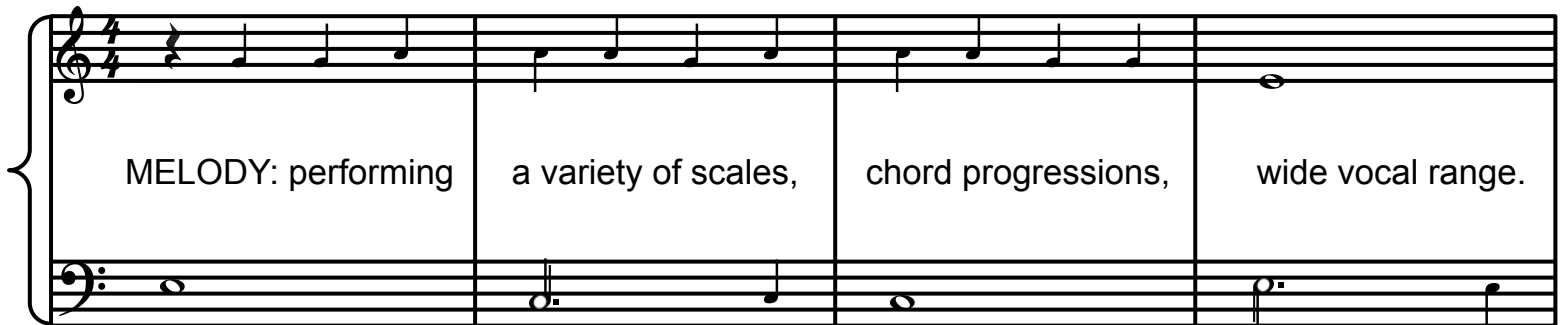

Music

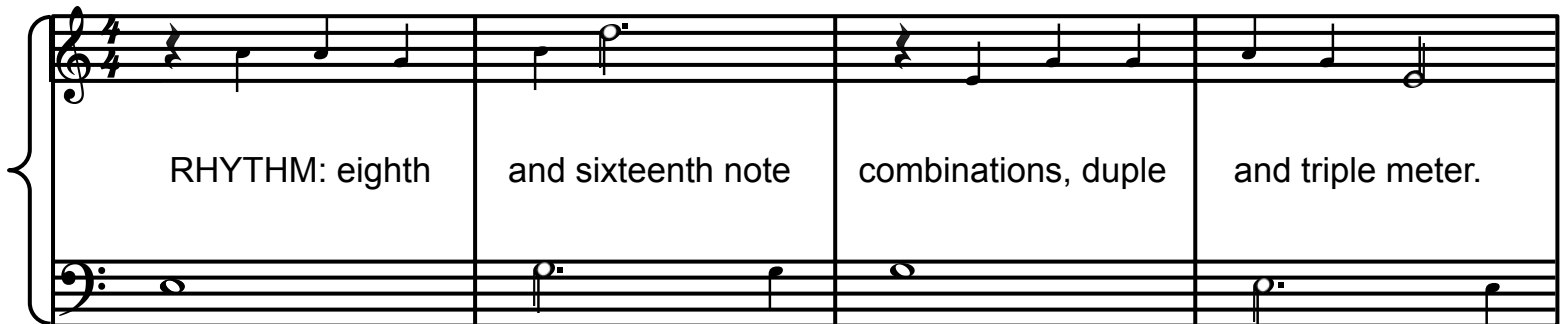

The purpose of music education in District 28 is to cultivate thoughtful members of society that are tuneful, beautiful, and artful. This is achieved by incorporating folk songs, multicultural music, and historical musical selections into the curriculum. A balanced mix of learning experiences utilizing creative movement, instruments, and singing are extended and further developed each year.

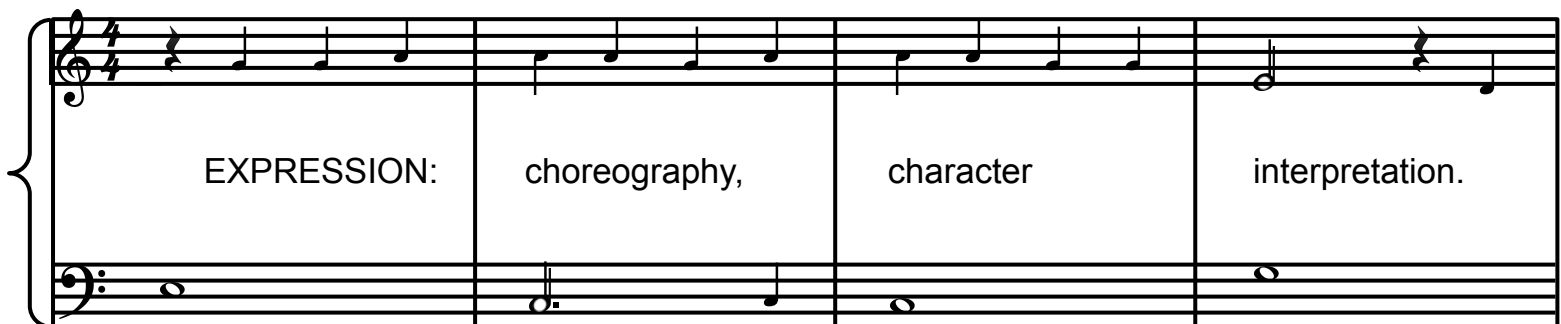

By the end of fifth grade, we expect students to be able to demonstrate...

MELODY: performing a variety of scales, chord progressions, wide vocal range.

RHYTHM: eighth and sixteenth note combinations, duple and triple meter.

EXPRESSION: choreography, character interpretation.

Physical Education

Northbrook School District 28 recognizes daily, elementary physical education as an integral part of every student's educational program. Growth in social, emotional, cognitive and motor skills is fostered through physical activity. In addition to the development of physical skills, we emphasize good sportsmanship and encourage healthful living. Cooperation and respect for each other help provide a safe environment, both physically and emotionally.

Healthful, active lifestyles are taught through developmentally appropriate physical activity. The goal of elementary physical education is to achieve and maintain a healthy level of physical fitness that begins at the earliest possible age and progresses sequentially.

In grades 3-5 we expect students to gain knowledge and skills in the following areas:

MOVEMENT SKILLS

- combination of locomotor movements (dance movements, tumbling)
- combinations of non-locomotor movements (push-ups, curl ups, etc.)
- combinations of locomotor and non-locomotor movements (running and throwing, running and kicking, running and bending, etc.)
- combinations of manipulative movements (lead up activities and sport variations)

PHYSICAL FITNESS

- components of physical fitness (cardiovascular endurance, flexibility, muscular endurance, agility and muscular strength)
- heart rate (identifying and recording)
- goal setting (self assessment, logging, etc.)
- body system awareness (muscular and skeletal)

Physical Education (cont.)

In grades 3-5 we expect students to gain knowledge and skills in the following areas:

TEAM BUILDING

- individual responsibility during group activities (work independently on task until completed, following rules, settling disagreements, etc.)
- responsibilities as a team member (work cooperatively with a partner or small group to reach a shared goal during physical activity)

HEALTH EDUCATION

- nutrition
- human body
- safety

Instrumental Music

JUNIOR BAND (Primarily 5th grade)

Junior Band performs three concerts per year. Students are automatically placed in Junior Band after successful completion of Beginning Band. The large group rehearsals are held on Tuesday and Thursday mornings. Each instrumentalist also participates in an instrument specific sectional one additional morning every three weeks. All rehearsals for Junior Band are held at the Junior High.

String ORCHESTRA (Primarily 5th grade)

Students placed in String Orchestra have completed level two and are working on level three materials in their lessons. This orchestra starts the year reviewing and refining the skills found in level two, and then concentrates on the material found in level three for the remainder of the year.

String Orchestra rehearses three times per week on Monday, Tuesday, and Thursday mornings at Northbrook Junior High. Monday mornings are alternating sectional rehearsals- violin/viola one week, and cello/bass the next.

The orchestra performs in three concerts throughout the year in December, March and May, and also in a tour of the elementary schools. Students also are required to participate in the fall solo and ensemble event. Director: Mr. Mike Govert - mgovert@northbrook28.net
